

HYPERLINK REFERENCES FOR BLOGS

In computing, a **hyperlink**, or simply a **link**, is a **reference** to data that the reader can follow by clicking or tapping. A **hyperlink** points to a whole document or to a specific element within a document. Hypertext is text with **hyperlinks**. The text that is linked from is called anchor text.

Alternatively referred to as a **link** and web **link**, a **hyperlink** is an icon, graphic, or text that links to another file or object. The World Wide Web is comprised of **hyperlinks** linking trillions of pages and files to one another. For **example**, "Computer Hope home page" is a **hyperlink** to the main page of Computer Hope.

Create a hyperlink to a location on the web

1. Select the text or picture that you want to display as a hyperlink.
2. On the Insert tab, click Hyperlink. You can also right-click the text or picture and click Hyperlink on the shortcut menu.
3. In the Insert Hyperlink box, type or paste your link in the Address box.
